DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 10-16, 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pernick (4043156).

Pernick (4043156) teaches the invention as claimed including a body (14) having a knitted section with a plurality of yarns disposed in a knitted direction, said body having an opening (see figure 1) in said knitted section; and a fringe (18f, 16f, column 2, lines 47-50) being between said knitted section and said opening, said fringe being defined by each yarn of said plurality of yarns extending into said opening a predetermined distance along said knitted direction. Pernick does not teach the specific fringe length of about 2cm or the ratio of yarn length. It would have been obvious at the time the invention was made to one of ordinary skill in the art to which the invention pertains to provide the length of about 2cm and the specific ratios claimed since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980). Additionally, Pernick suggests at column 4, lines 9-15 that the length of the fringe can be adjusted as desired.

Allowable Subject Matter

Claims 7-10 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
